ACADEMIC PROJECTS

Post Graduation Project - Placement Management System   **Dec 2023 - Mar 2024**

- This project aims to build a website targeting freshers seeking their dream job from different domains.
- Created separate login forms for the user and the admin and implemented the forgot password feature for the user login.
- Added a feedback menu and account settings menu in the user portal in which the user can send feedback to the admin, change password edit their details, or delete their account.
- The Admin portal is designed with four buttons to view the number of registered users, add a company, view the company, and view feedback received from the users.

Under Graduation Project - Website Creation for Women Empowerment   **Dec 2021 - Apr 2022**

- It is a community-based group project in which a website was created for a women's trust.
- Directed a group of four people in this project.
- This website is created using HTML, CSS, BootStrap, JavaScript, PHP, and MySQL.
- Implemented registration and login for the Membership and Admin modules for the trust for managing the user records.
